EXP.NO-4b	Form Design for a Business Application(Advanced Fields)

AIM:

To extend the existing **Healio Patient Appointment Booking Form** by incorporating all 17 Advanced Fields in Zoho Creator for automation, computed values, doctor availability verification, media handling, and digital appointment management.

INTRODUCTION:

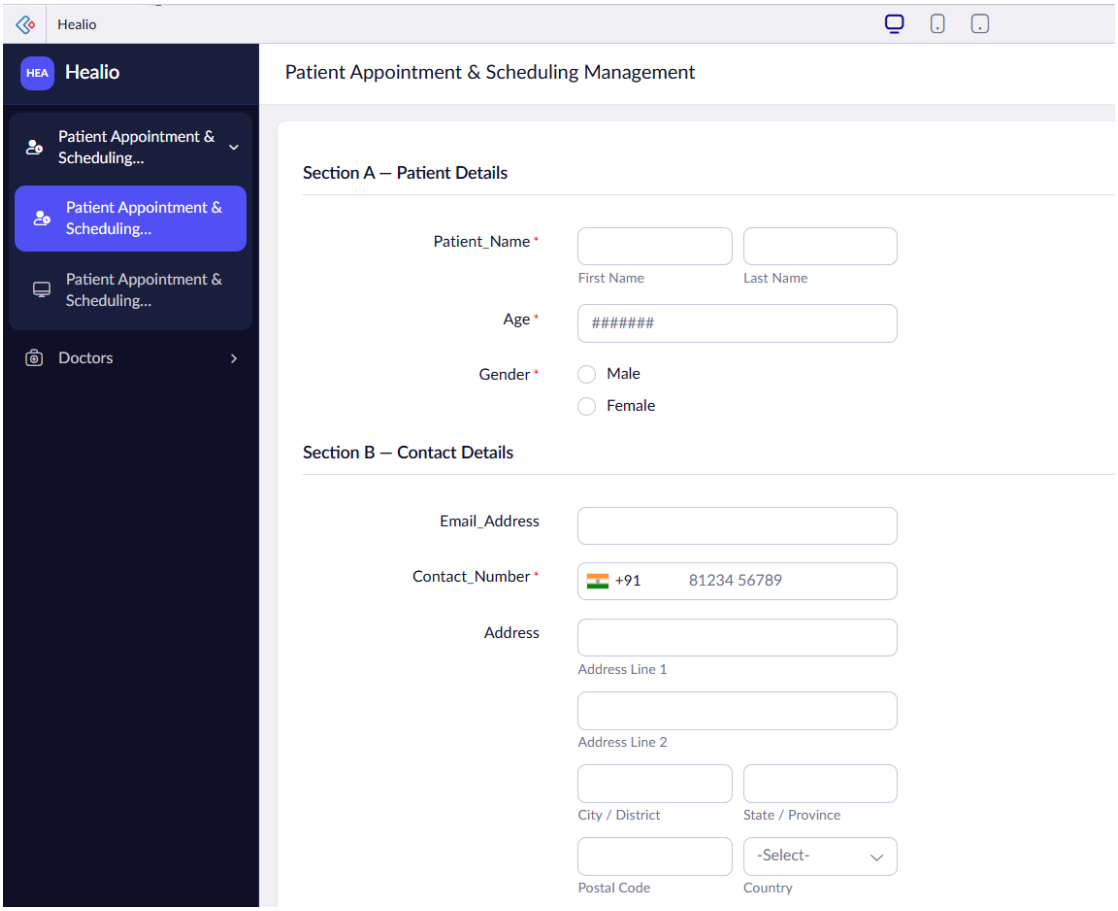

The advanced version of the Healio application extends the basic appointment form with features such as doctor lookup, family-member registration, medical document uploads, digital signature, fee calculation, unique appointment identification, and QR-based check-in. These fields demonstrate how Zoho Creator can automate and organize additional healthcare requirements.

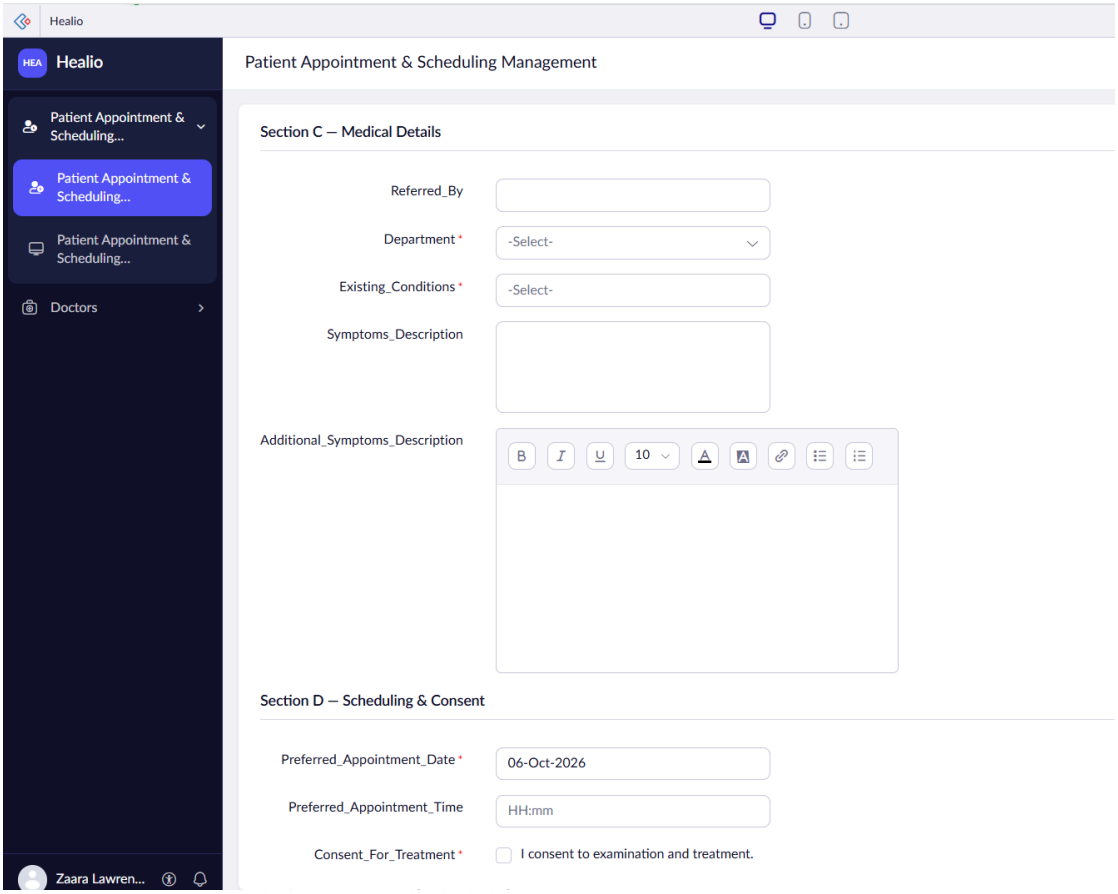

Patient Appointment Booking System:

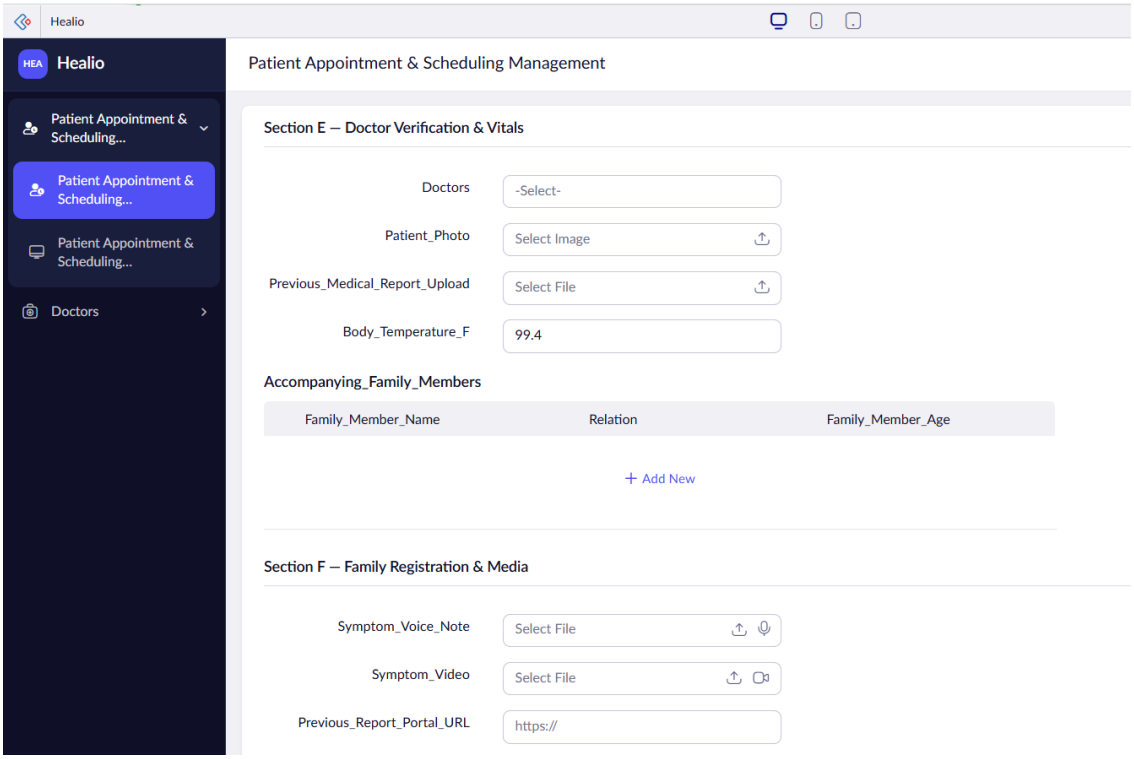

Field Name	Field Type	Purpose of Collected Data	Validation	Mandatory

RESULT:

The **Healio Patient Appointment Booking Form** was successfully extended with the required 17 Advanced Fields. The application supports doctor availability lookup, family-member registration, medical file and media handling, automated fee calculation, digital consent, unique appointment IDs, and QR-based appointment identification. The submitted information is available through the extended **Appointment_Booking_Report**.
