EXP.NO-2	Setting Up a Zoho Creator Account and Exploring the Platform Architecture and Interface

AIM:

To create a Zoho Creator account and understand its architecture and user interface.

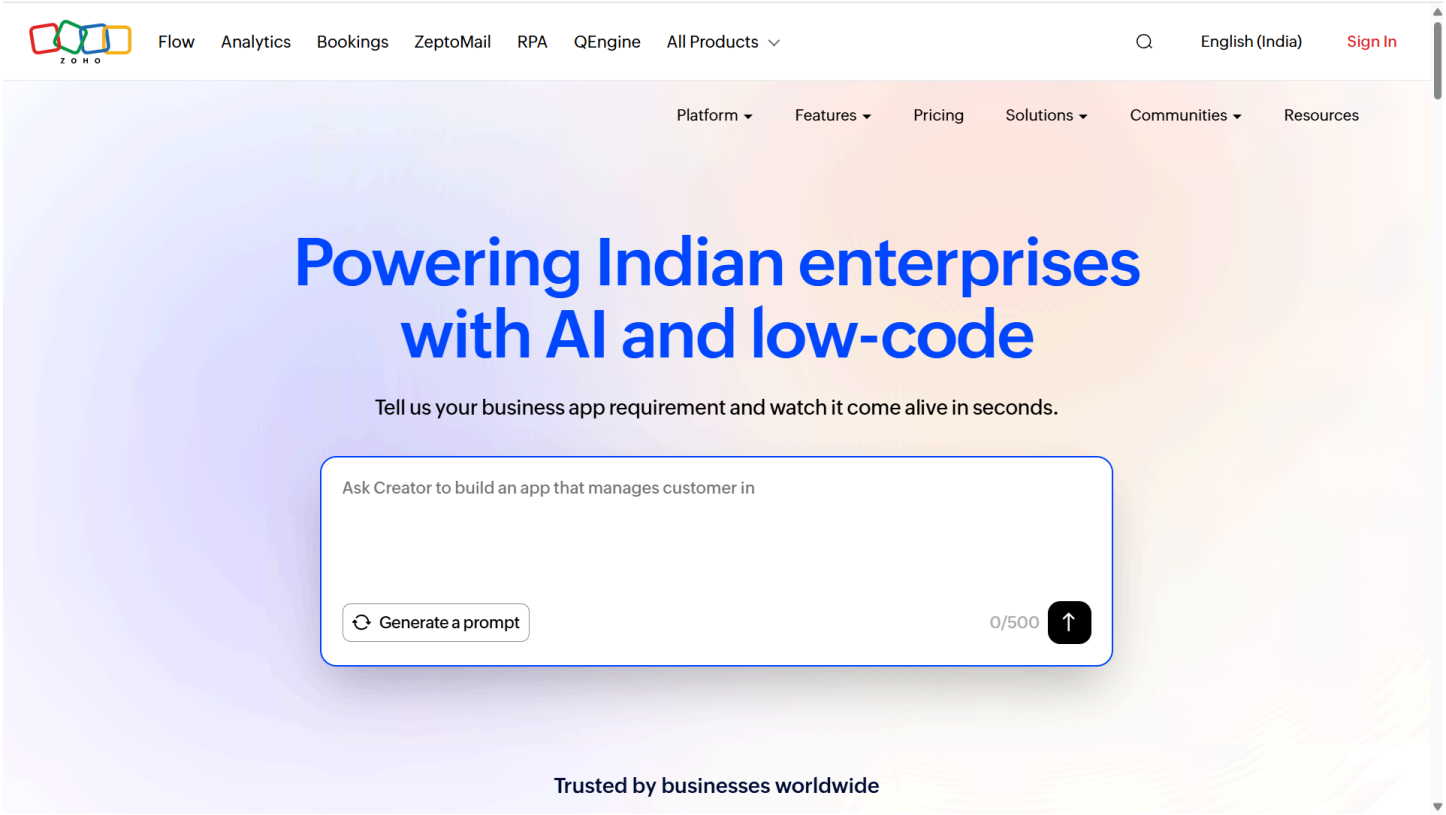

PROCEDURE:

Step 1: Visit the Zoho Creator Website

Open a web browser and navigate to the Zoho Creator homepage.

Description:
The Zoho Creator homepage provides options to sign in, create a new account, and learn about the platform's features.

Screenshot 1:

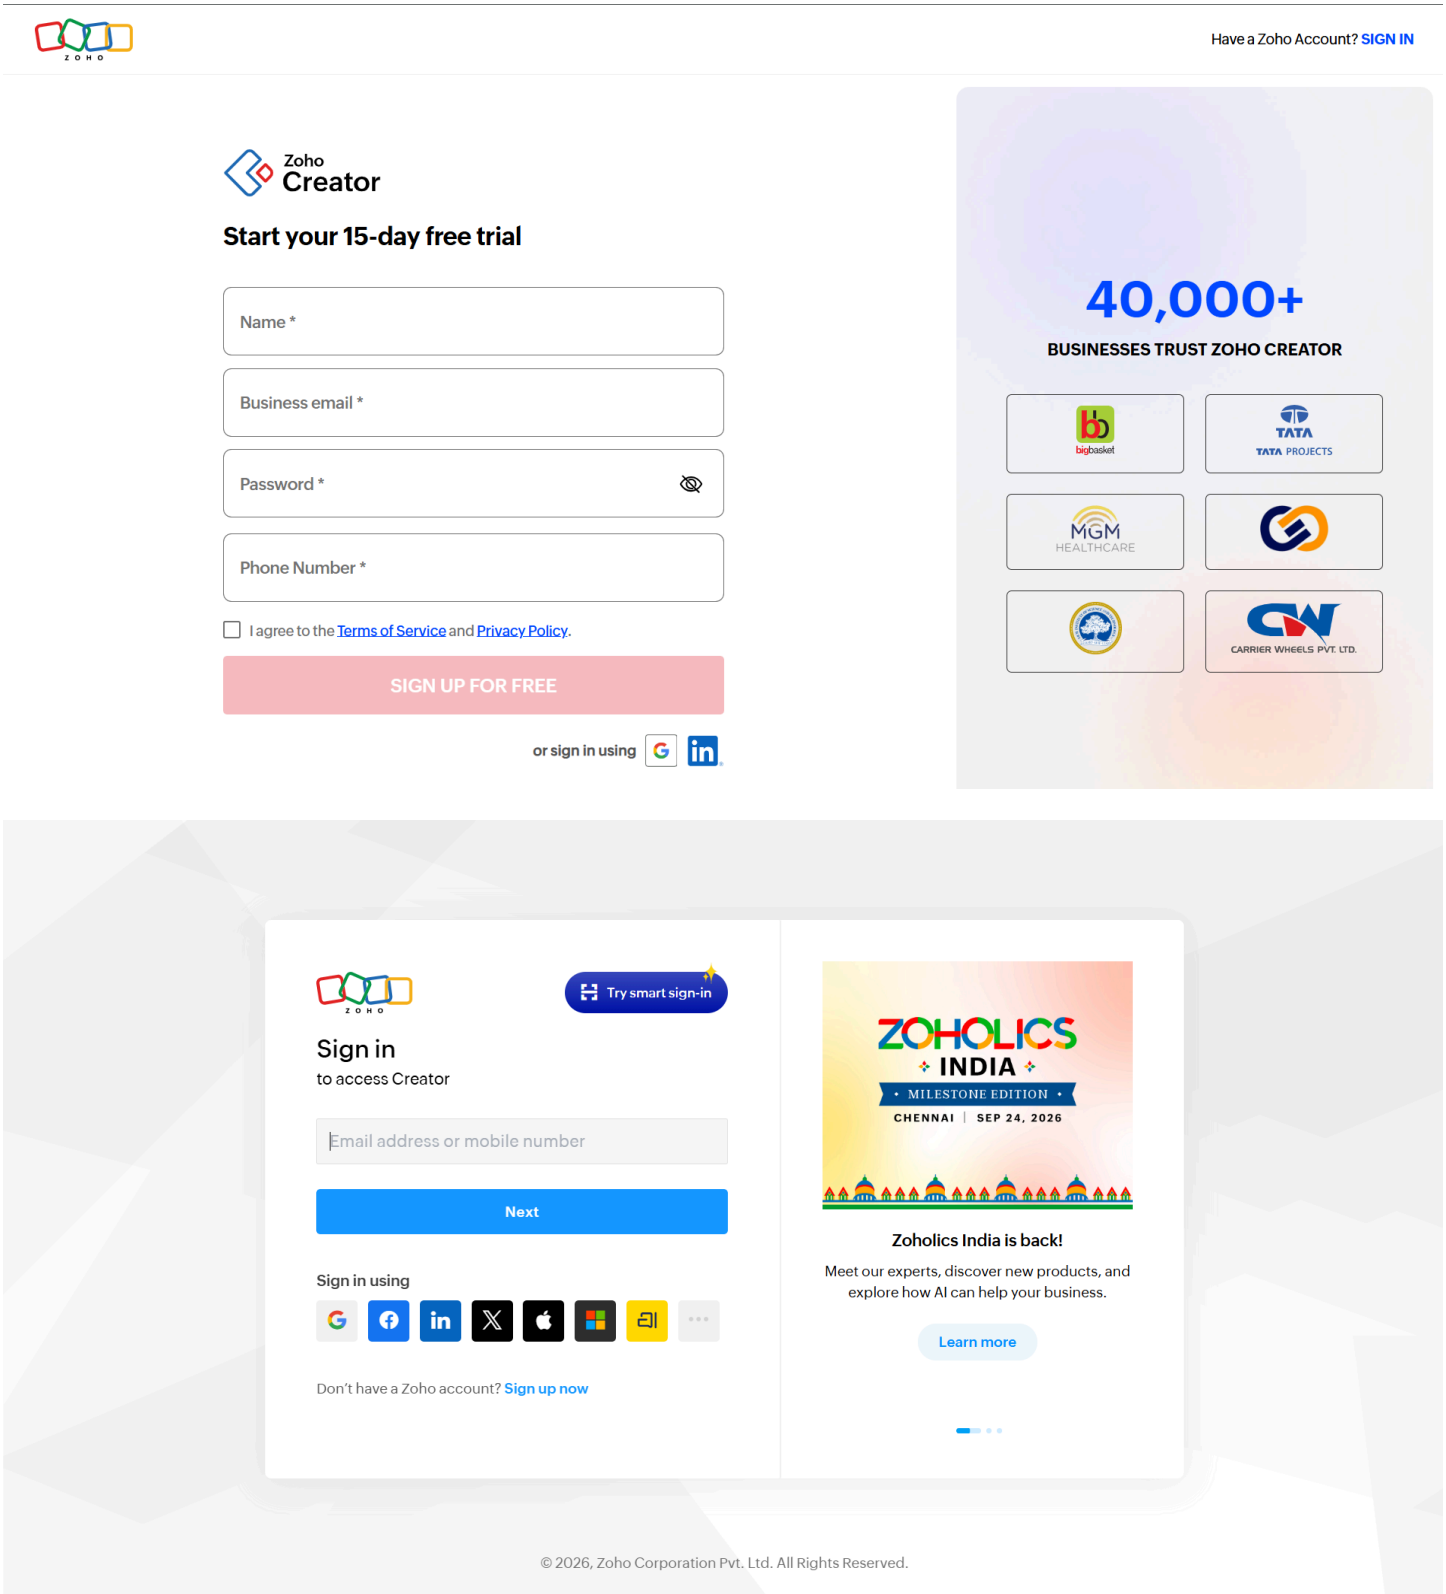

Step 2: Create or Sign In to a Zoho Account

Click **Sign Up** if you are a new user or **Sign In** if you already have a Zoho account. Complete the authentication process.

Description:

Users can create an account using an email address or sign in using their Google, Microsoft, or existing Zoho account credentials.

Screenshot 2:

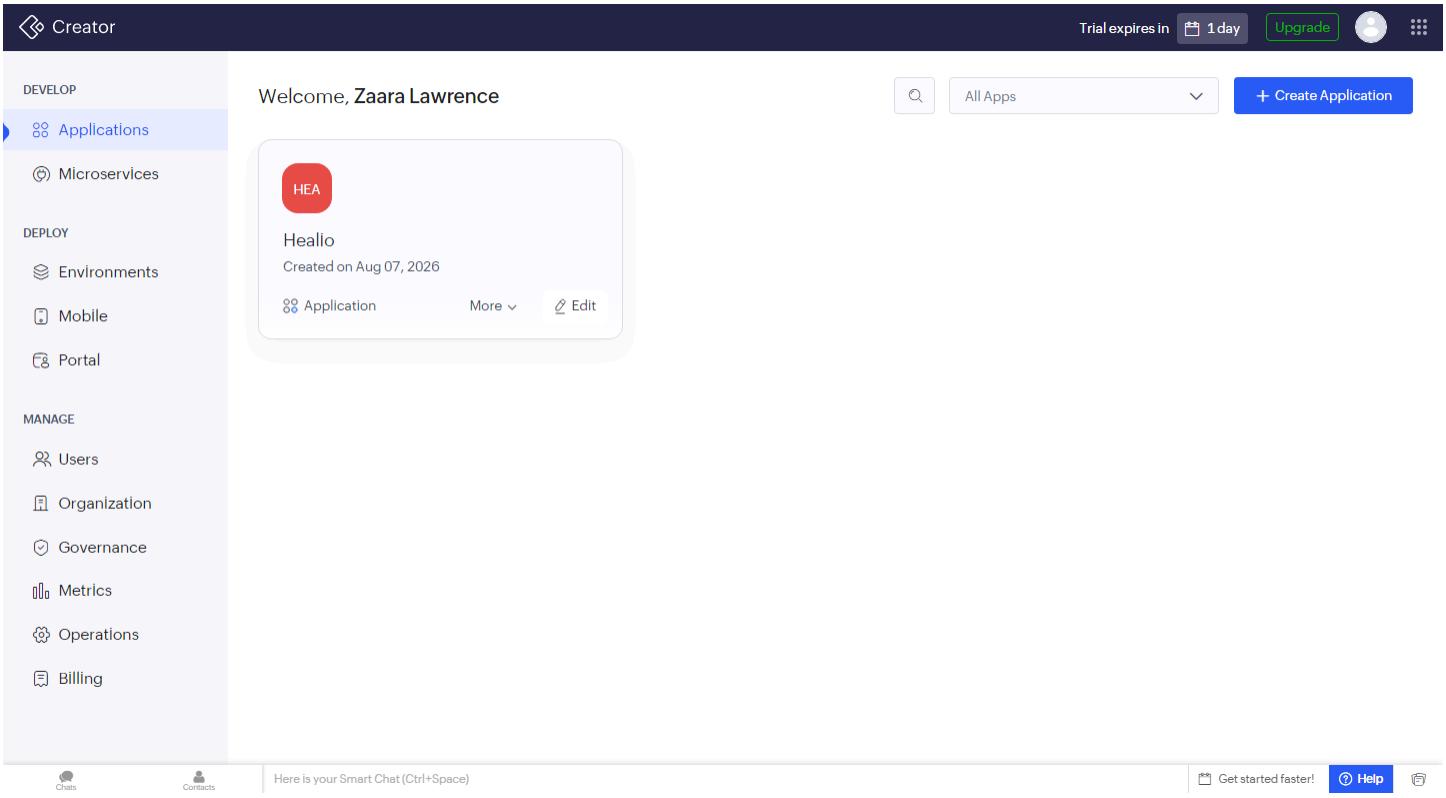

Step 3: Access the Zoho Creator Dashboard

After signing in, the dashboard is displayed.

Description:

The dashboard is the central workspace where users can create, manage, and organize applications. It also provides access to templates, recent applications, and account settings.

Screenshot 3:

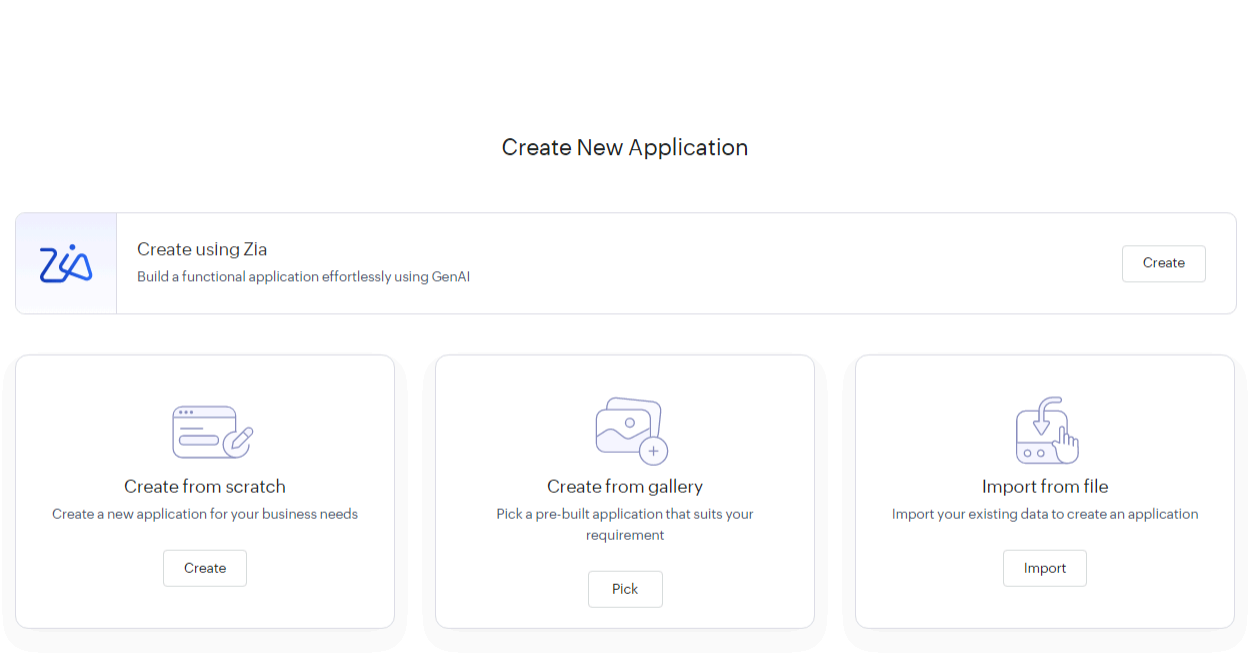

Step 4: Create a New Application

Create New Application and choose **Blank Application**

Description:

Zoho Creator allows applications to be created from scratch, using templates, or by importing existing data.

Screenshot 4:

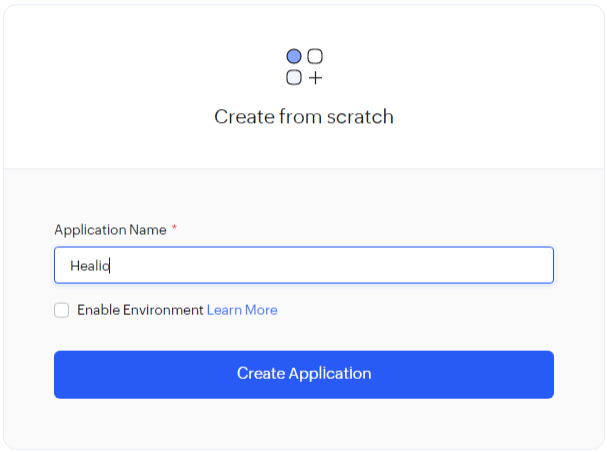

Step 5: Name the Application

Enter an application name (for example, **Healio**) and create the application.

Description:
Each application is assigned a unique name and serves as a container for forms, reports, pages, workflows, and other components.

Screenshot 5:

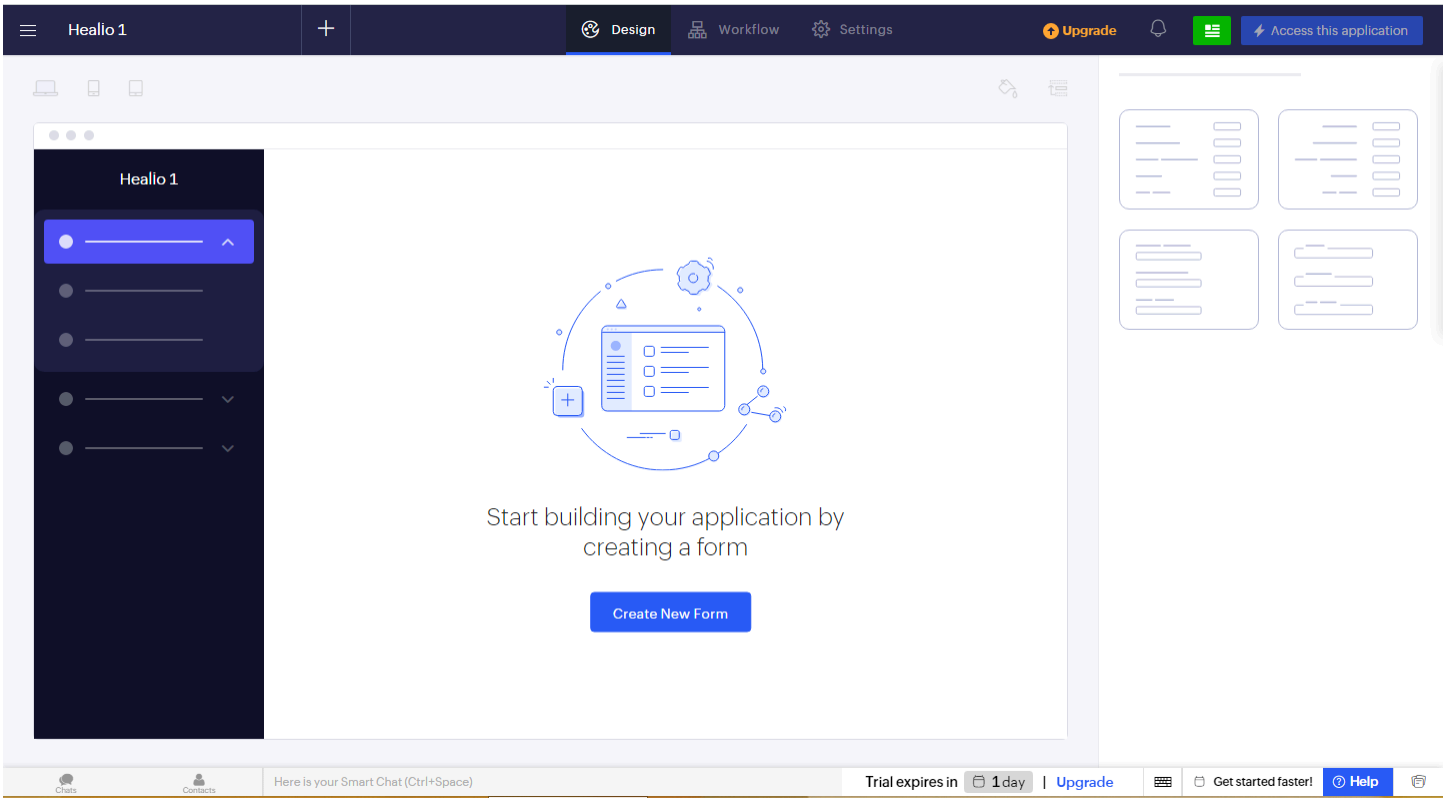

Step 6: Explore the Application Workspace

Open the newly created application.

Description:
The application workspace provides tools to design forms, generate reports, create pages, automate workflows, and manage application settings.

Screenshot 6: *(Application Workspace)*

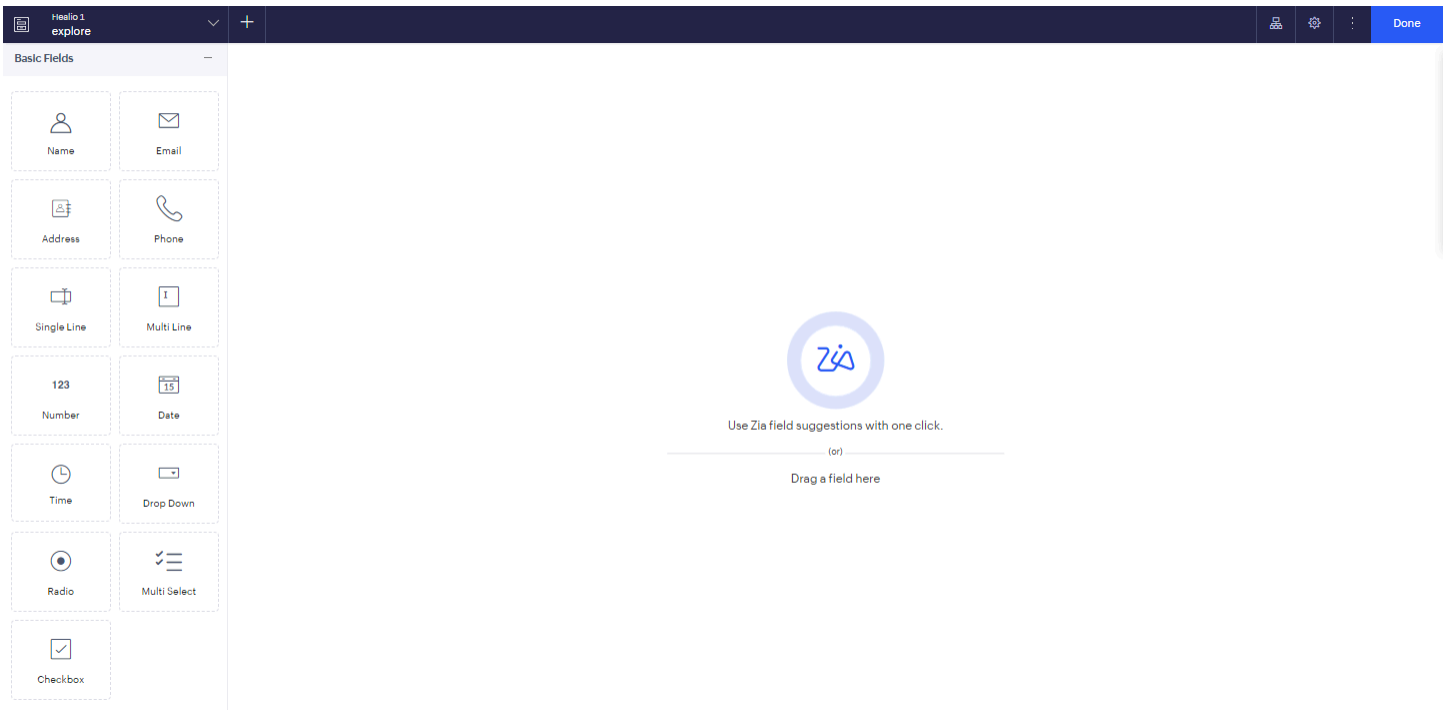

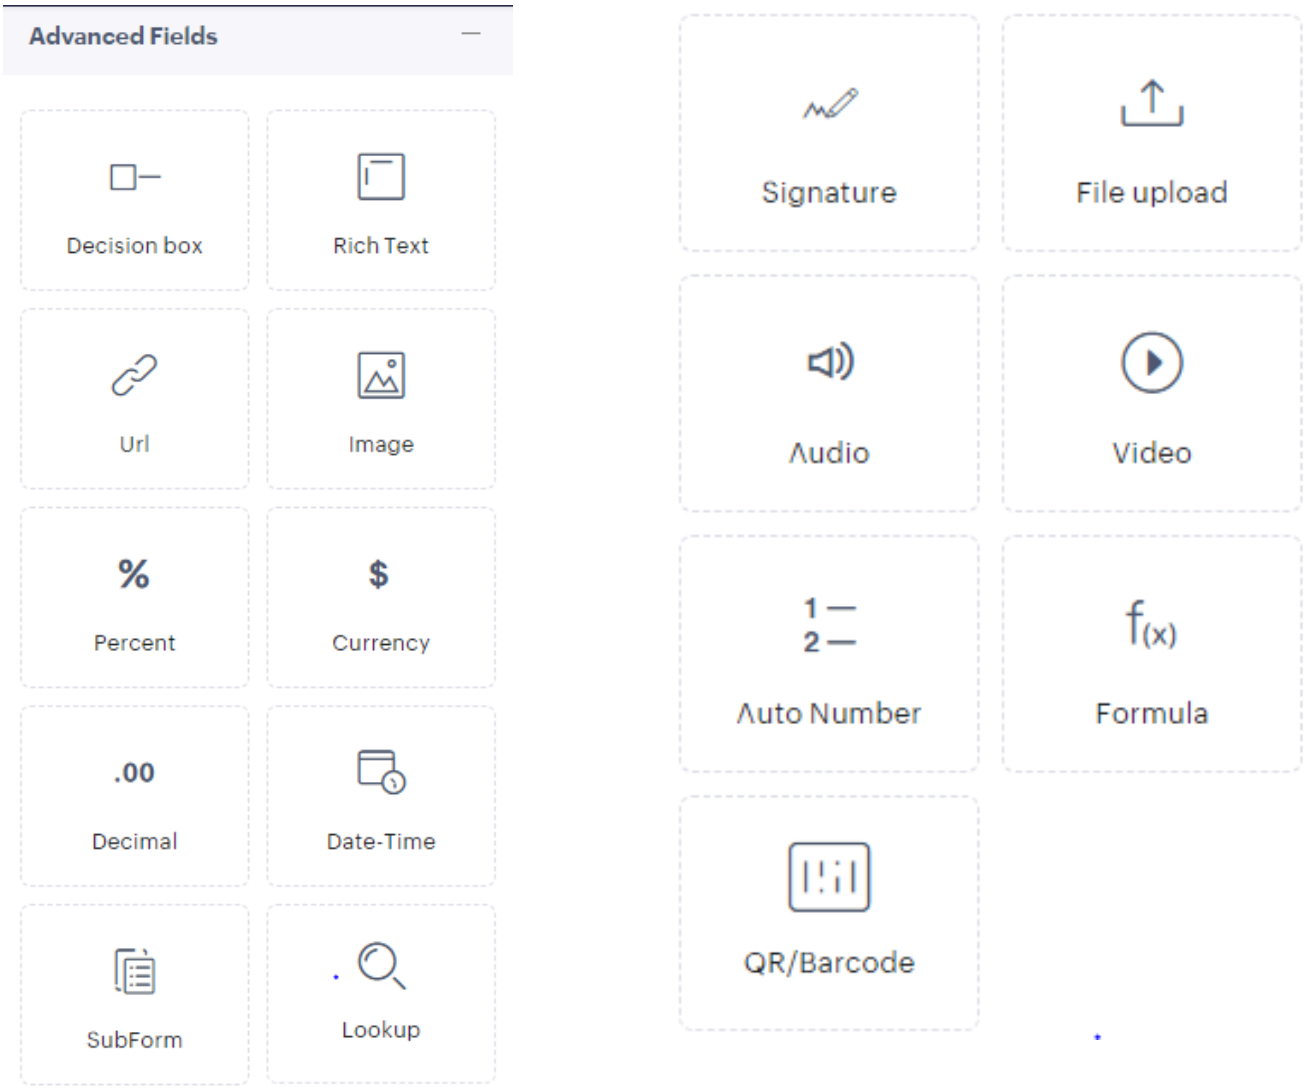

Step 7: Explore the Form Builder

Click **Create Form** to open the form builder.

Description:
The Form Builder contains various field types, such as text, number, email, date, image upload, lookup, and choice fields. Users can build forms by dragging and dropping components onto the design canvas.

Screenshot 7:

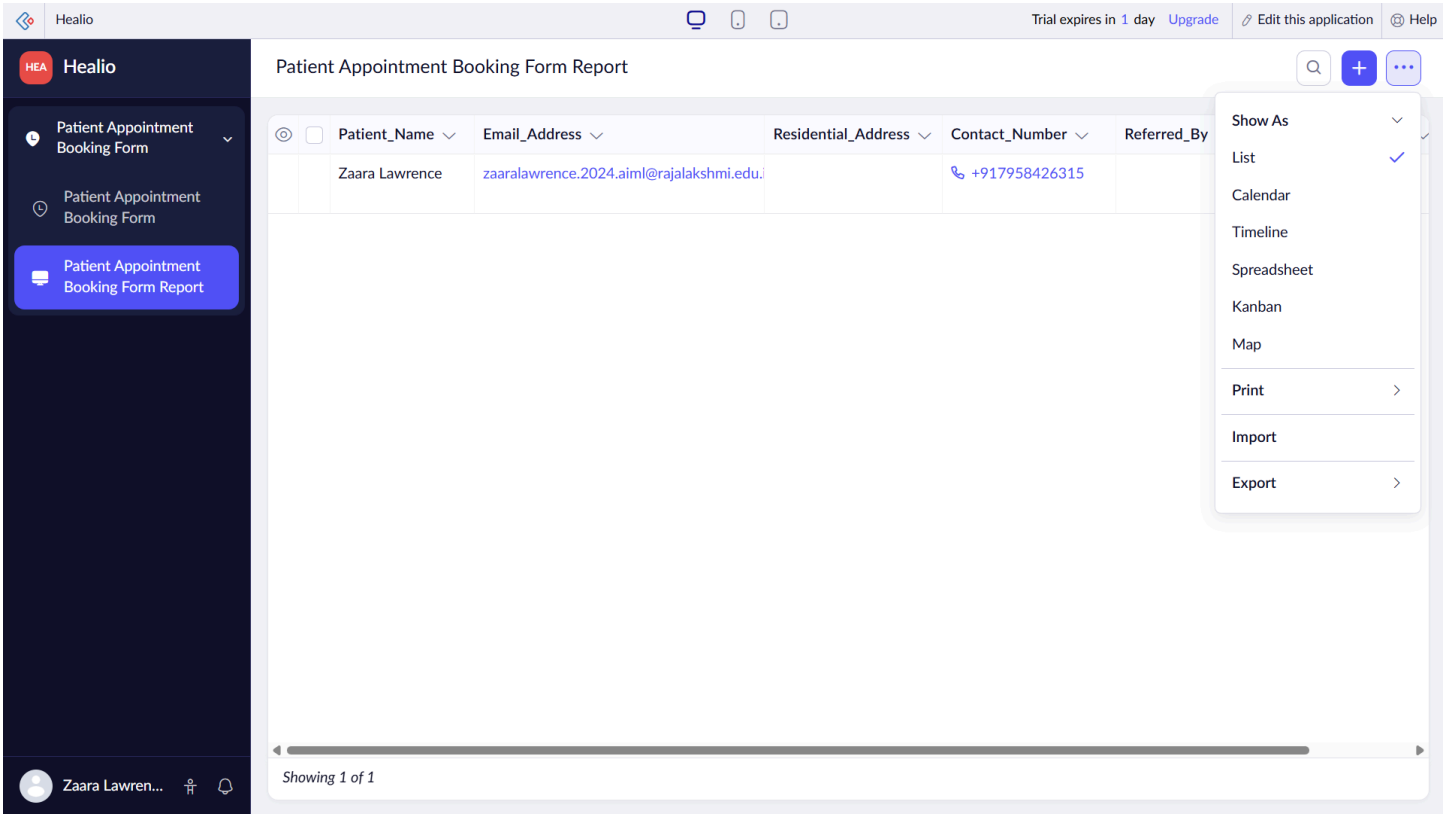

Step 8: Explore Reports

Navigate to the **Reports** section.

Description:
Reports display the data entered through forms. Zoho Creator automatically generates reports such as list view, summary view, and calendar view for efficient data management.

Screenshot 8:

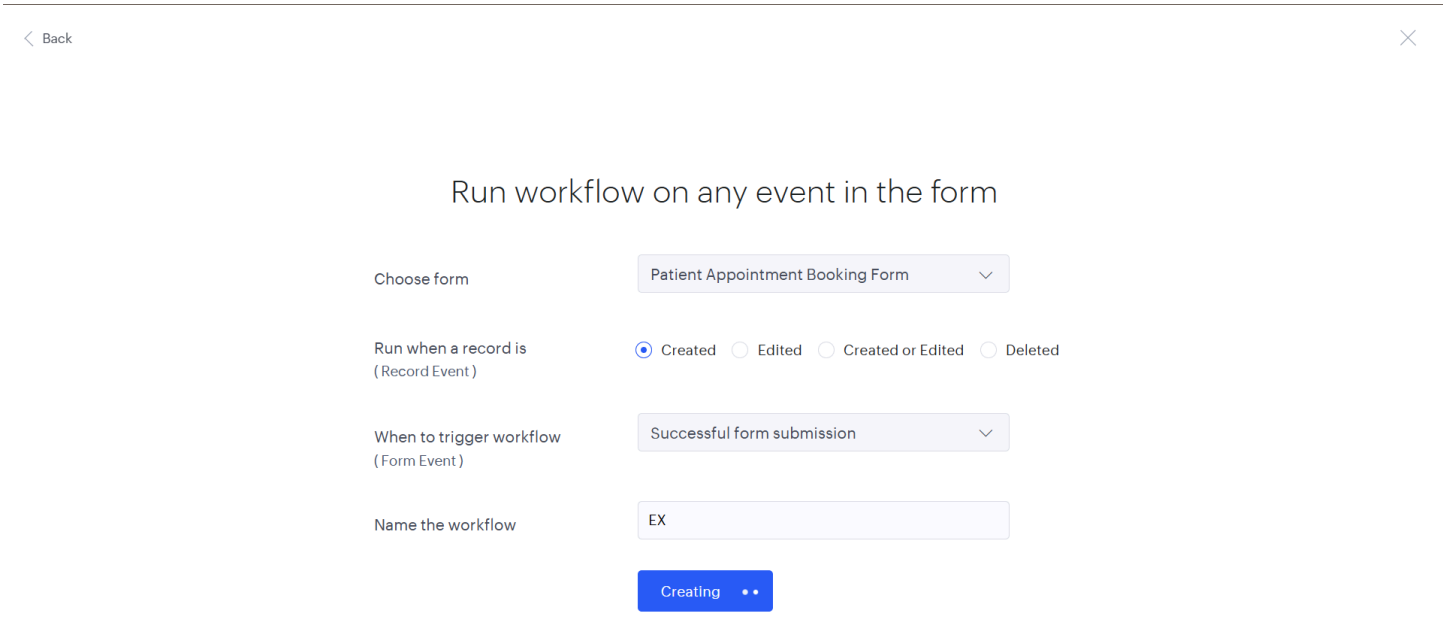

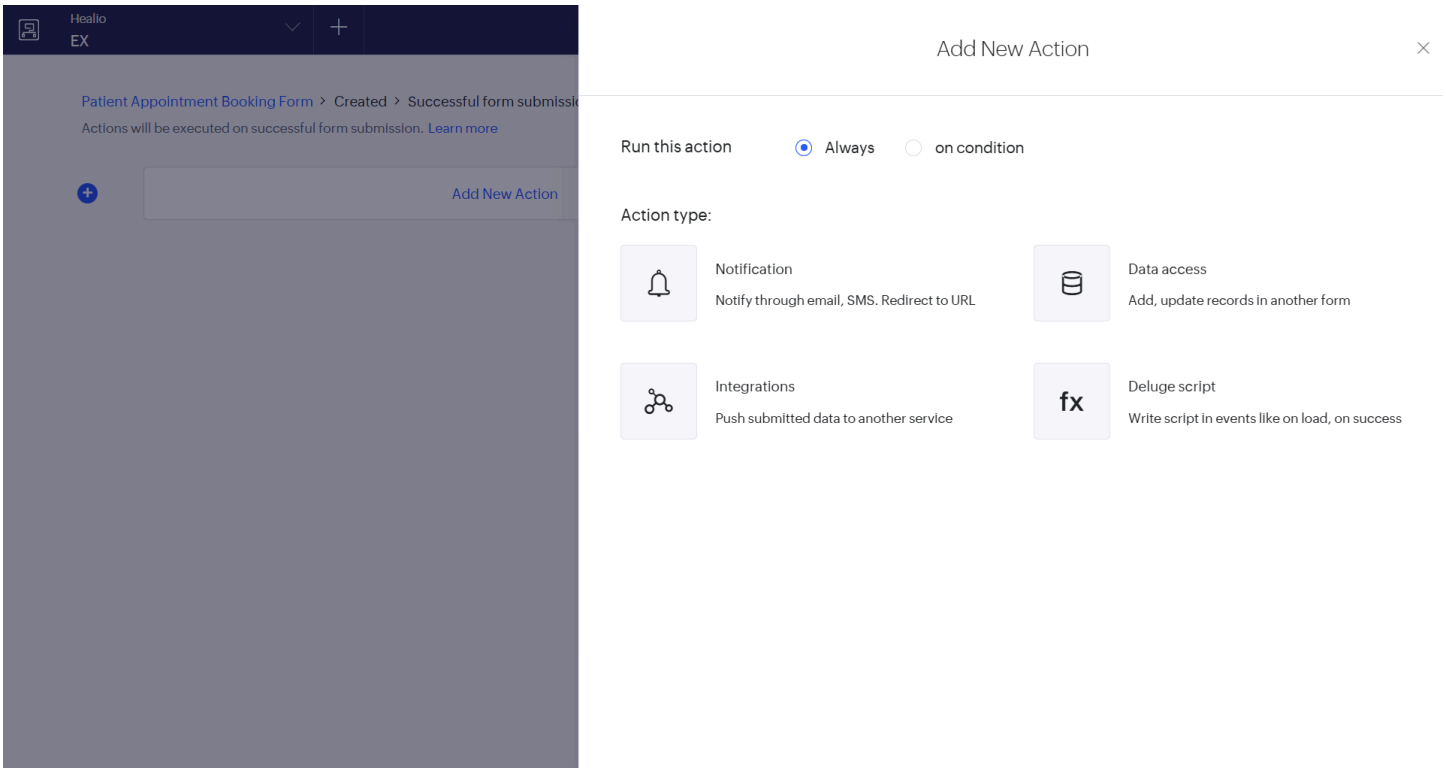

Step 9: Explore Workflows

Open the **Workflows** section.

Description:
Workflows allow users to automate tasks such as sending email notifications, validating data, updating records, and executing Deluge scripts based on specific events.

Screenshot 9:

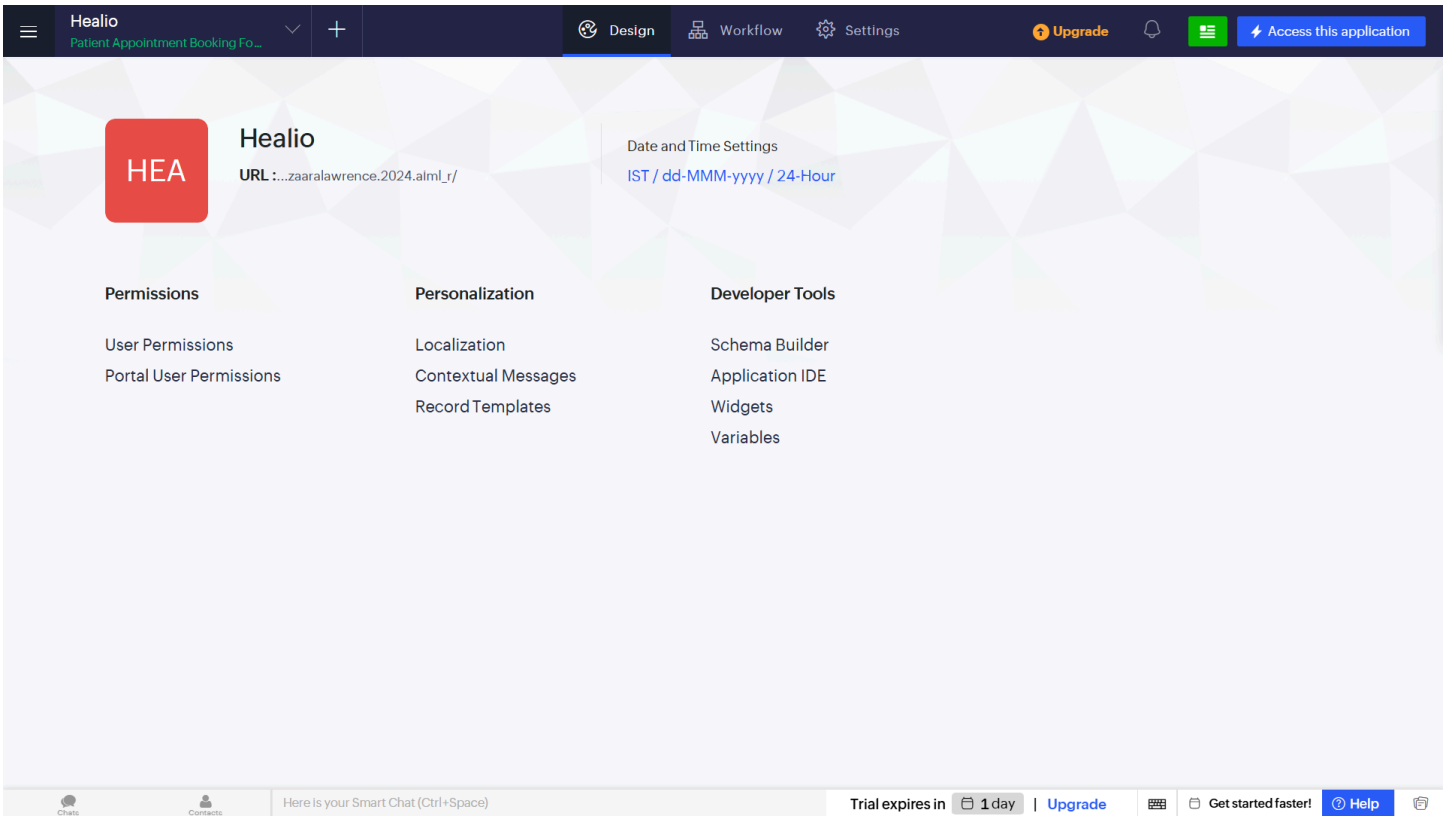

Step 10: Explore Settings

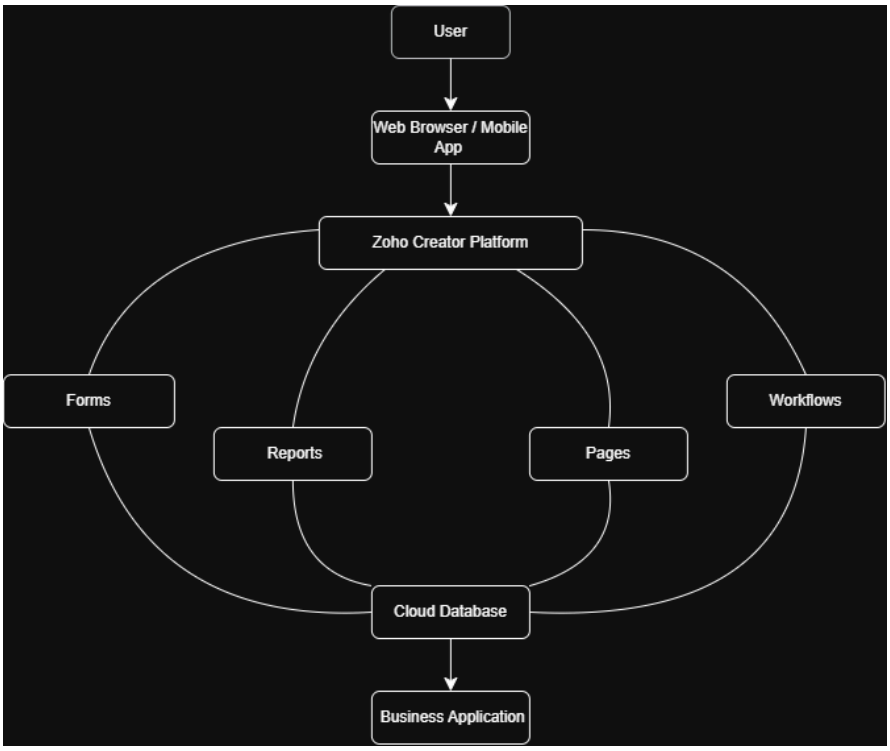

Open the **Settings** menu.

Description:
The Settings section provides options to manage users, permissions, integrations, security, themes, and application configurations.

PLATFORM ARCHITECTURE:

RESULT:

A Zoho Creator account was successfully created, and the platform's architecture, dashboard, application workspace, forms, reports, workflows, and settings were explored to understand the basic features of low-code application development.
