EXP.NO-5b	Patient Appointment Reports Suite — Reports, Dashboards and UI Builder

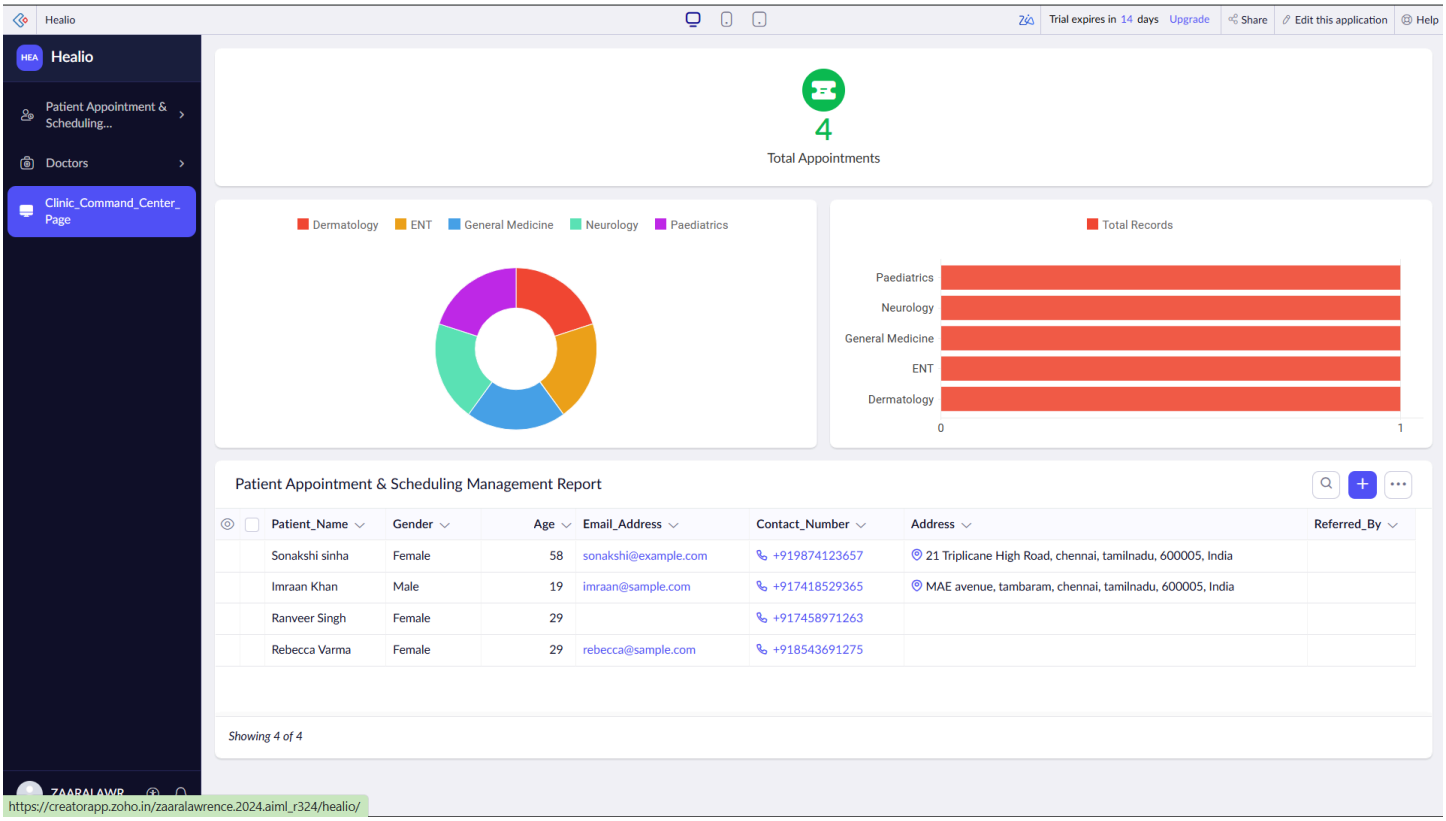

AIM:

To design and create an internal Clinic Command Center dashboard in Zoho Creator for the Patient Appointment & Scheduling Management application to monitor appointment statistics, department-wise workload, and patient booking records.

PROCEDURE:

1. Open Zoho Creator and access the Patient Appointment & Scheduling Management application.
2. Navigate to the Pages section and create a new blank page named Clinic_Command_Center_Page.
3. Add a main Panel element to organize the dashboard components.
4. Add a Count widget to display the total number of appointments.
5. Add a Donut Chart and Bar Chart to visualize department-wise appointment distribution.
6. Configure the charts using the Appointment Booking Form and select the appropriate department fields.
7. Add an Appointment Booking Report to display patient details such as name, gender, age, email address, contact number and address.
8. Arrange the widgets, charts and report properly on the dashboard.
9. Save the page and open the live application to verify the dashboard.

OUTPUT:

RESULT:

The Clinic Command Center dashboard was successfully created in Zoho Creator. It provides a centralized view of appointment statistics, department-wise visualizations and patient booking records, helping clinic administrators monitor appointment information efficiently.
